

Habeeb Ishola

Frontend developer focused on building responsive, accessible web experiences

hoishola973@gmail.com | +31 681 097 374 | Netherlands

SUMMARY

Frontend developer with a background in operations and coordination, bringing strong organization habits and attention to details into building clean, responsive web applications. Self-taught in HTML, CSS and Javascript, with a personal portfolio site designed, built and deployed independently. Comfortable working through problems methodically, debugging, iterating and shipping polished, functional interfaces.

RELEVANT PROJECTS

Personal Portfolio Website

Self-directed project · 2026

- Designed and built a responsive personal portfolio from scratch using HTML, CSS, and JavaScript, including custom hover animations, smooth-scroll navigation, and a dark themed UI.
- Implemented interactive elements such as a sliding-text call-to-action button, animated skill cards, and a grayscale-to-color profile image effect.
- Deployed and version-controlled the project using Git and GitHub, with hosting via Netlify.

SKILLS

Programming Languages

HTML, CSS, JavaScript

Tools & Platforms

Git, GitHub, Supabase, Netlify, Figma

CURRENTLY LEARNING

Javascript fundamentals(DOM, events, fetch/API's), with React next.

EDUCATION

Wittenborg University of Applied Sciences

Information Management

INTERESTS

Reading, swimming, and continuous learning in web technologies.
